

TOTEM BOOKSHELF

• Antonio Lauriola, Vito Vero / LI VING design studio
• Italy

The bookshelf is composed of three vertical modules, three "ribs" connected with a big, horizontal oak shelf. The latter is "burnt" with sodium hydroxide, creating a stark contrast with the mat lacquering of the vertical elements.

WELTFELD

• Matthias Ries
• Germany

The "Weltfeld" storage system was developed during the designer's product design studies. Years later the project continued to make an impression in different exhibitions. However, it remains to be an unfinished product open for more possibilities.
